

Science Principles

Pupils' Version

Our Vision Statement:

At Deneholm Primary School, we empower children by providing them with fun and exciting science curriculum which gives them opportunities to explore, ask scientific questions and confidently take a lead on scientific inquiry in order to gain a deeper understanding of the world around them.

Science learning and teaching is good in Deneholm Primary when...

- We explore using a range of resources to enhance our learning.
- Our teachers ask a wide range of questions to stimulate our thinking.
- We take a lead on our experiments which helps us to ask questions.
- We have fun and engaging lessons.
- We do some of our learning outdoors.
- Our work is displayed to show the fantastic science work we have been doing.
- We learn scientific vocabulary and use them in our work.
